

NUCLEAR INCIDENT

Special plans have already been developed to protect the public in the event of a nuclear incident in our area. These plans give specific attention to citizens who live work or visit within 10 miles of a nuclear power plant. If necessary, area officials would declare an emergency and take measures to ensure public safety.

Warning Sirens

If you hear sirens in within a 10-mile radius of Peach Bottom and are not sure what they mean, tune to the designated Emergency Alert System Stations for Harford County. Radio stations WBAL 1090AM, WXCY 103.7FM, WHFC 91.1FM and television station COMCAST Channel 21 and Clearview Channel 7.

Shelter-in-Place or Evacuation

Officials may recommend that people either take shelter indoors or evacuate an area. It is critically important that you follow the recommended course of action. Staying home when instructed to evacuate or driving around when urged to stay indoors could expose you and your loved ones to danger unnecessarily.

Evacuation Route/Reception Centers

- **Evacuation Route:** Local routes to Maryland Route 136. Make a right turn onto Cool Spring Road. Make a left turn onto Thomas Run Road. Harford Community College will be 2.2 miles on the left of Thomas Run Road.
- **Reception Center:** Harford Community College
